Professional Summary
Versatile Full Stack Engineer with 3+ years of experience designing and building scalable web applications. Proficient in Python, J

Technical Skills
Languages: Python, JavaScript, TypeScript, SQL, HTML5, CSS3, Bash
Frameworks & Libraries: Flask, Django, React, Node.js, Express, TailwindCSS
Databases & Cloud: PostgreSQL, SQLite, Redis, AWS (S3, EC2), Git, Linux
Concepts & Methods: RESTful APIs, Unit Testing, Agile/Scrum, CI/CD

Work Experience
Software Engineer | CloudScale Systems (2022 - Present)
- Developed and maintained 8+ RESTful microservice endpoints using Python and Flask, improving response latency.
- Built responsive client dashboard interfaces using React and TypeScript, serving over 15,000 active monthly users.
- Optimized PostgreSQL relational queries and database indexing, reducing query load by 35%.
- Collaborated with cross-functional engineering team using Agile sprints and GitHub code reviews.

Junior Developer | InnovateTech Labs (2020 - 2022)
- Implemented backend data processing pipelines using Python and SQL.
- Designed reusable UI component libraries with React and CSS3.
- Wrote automated unit tests using pytest, increasing overall code test coverage to 82%.

Education
Bachelor of Science in Computer Science
University of California, Davis (Graduated 2020)

Projects
- TaskForge: Full-stack productivity web app built with Flask, React, and PostgreSQL. Features JWT authentication and real-time
- DevMetrics: GitHub API analytics dashboard visualizing pull request throughput for development teams.
